

BE PROFITABLE BE EFFECTIVE

KEEP ON IMPROVING THE WAY YOU WORK,
LEVERAGING TECHNOLOGY TO ITS FULLEST

When you started your business, was your dream to limit your services to just one location, serving only those nearby? In today's global economy, you have the opportunity to reach a much larger audience with your products and services. To achieve this, you need to shift your mindset and transform your operations. How can you take your business to the next level? By leveraging technology, automating routine tasks that consume your time, and assembling a team to safeguard the assets you've built. Techellence can swiftly stabilize your business and enhance the way you operate, helping you reach new heights.

ABOUT TECHELLENCE

Techellence is a premier technology solutions provider that empowers businesses to thrive with minimal or no internal IT staff. Our expert team delivers comprehensive infrastructure setup, systems management (managed services), software development, and automation, enabling your business to leverage technology as a powerful catalyst for growth. At Techellence, we are dedicated to enhancing your profitability, efficiency, and security, ensuring that technology becomes a driving force behind your success.

YOUR TECHNOLOGY FOUNDATION AND DRIVER

Techellence provides a foundation for your success, minimizing the headaches associated with managing technology in your business operations. Have you heard about the recent breaches and ransom payments large companies have faced? How compliant are you with the regulations set for your industry? Do you have a security incident plan? These are concerns you shouldn't have to worry about—we handle them for you. Beyond being your technology foundation, Techellence supports your exponential growth by leveraging technology as an accelerator for your business. We grow as you do. We are in this together.

TECHNOLOGY MANAGEMENT

Techellence will secure your IT environment by managing all your devices, networks, databases, software licenses, technology vendors, and more. This comprehensive support allows you and your staff to focus on operating and growing your business without the hassle of dealing with IT issues. With access to our expert team whenever you need, your systems will remain secure and protected from external threats.

SPECIALIZED EXPERTISE

The Techellence team comprises technology experts well-versed in cutting-edge technologies and tools. There's no need to build your own IT team; we manage your technology efficiently for you. If you happen to have IT staff, they can focus on their strengths while we handle the specialized tasks.

STRATEGIC PLANNING

Being spontaneous is fun, but not when it comes to your IT decisions. We learn the needs of your business, discuss your goals and create a tailored roadmap that meets both, so you can make more confident, cost-effective decisions. Our quarterly meetings are designed to help solve problems together and put things to action.

SOFTWARE DEVELOPMENT

Excel not working for you? Techellence can create customized solutions, including proprietary software tailored to your company's unique needs. Start-ups often use readily available tools to quickly prove their concepts and generate sales. However, as your company grows, these tools no longer work or facilitate the necessary collaboration among your growing team. Share your challenges with us, and we can solve that problem.

MINIMIZED DOWNTIME, IMPROVED AVAILABILITY

Your constant availability is essential for your customers' satisfaction. Our team of experts monitors your devices and network's performance to maximize connection speed and minimize latency, ensuring you consistently exceed customer expectations. We also provide reliable data backup and rapid recovery solutions, so your systems can be restored quickly in any situation. This gives you more time to focus on advancing your business and spending quality time with those you love.

24/7/365 MONITORING

We don't take breaks, so you can. Cyber-thieves aim to steal your sensitive proprietary data, disrupt your operations, hold you hostage for payment, and erode customer trust. They strike when you least expect it. Our team of expert engineers and technicians proactively monitors your systems to prevent successful attacks to bring your operations down. In the unlikely event of an interruption, we are ready to immediately resolve the issue, ensuring your business stays secure and operational. What attack?
