BUSINESS-FOCUSED TECHNOLOGIST AT YOUR SERVICE

With Techellence Chief Information Officer (CIO) at your side, you are on your way to make your business more profitable by reducing unnecessary expenses, improving the way your company works, and leveraging technology for expansion.

Get the benefit of an executive business technologist for a fraction of the cost of a full-time staff member

Strategic IT Alignment

Focus technology efforts to align with your business goals

Efficiency and Productivity

Identify ways to improve your business processes, replace inefficient tools, and automate routine work

Vendor Management and Negotiation

Handle your technology vendors to reduce costs and maximize benefits

Data Management and Analytics

Help you identify metrics to keep your business focused on goals and continue monitoring them

Global Scalability and Leadership

Help grow your vision and setup technology for expansion and scalable growth

Scope of Tech Leadership Activity:

- Technology Roadmap
- Risk Management
- Management for Major Technology Projects
- IT Operations Review and Optimization
- Vendor Performance Review
- Ideation and other needs

With our Chief Information Officer solution, grow exponentially.

We will consistently deliver results for you. Below outlines the ongoing items to be provided as a part of this solution.

MONTHLY

IT Operations Review

Monitor and review the performance of IT systems and operations.
Address any issues and ensure systems are running smoothly.

Executive Leadership Meeting

Meet with executive team (CEO, COO, CFO, GC and CAO) to provide updates on status of IT projects; supplement with further updates as needed. Working with leadership, identify ways for strategic growth and minimize unnecessary expenses.

Performance Metrics Review

Analyze key performance indicators (KPIs) for IT operations, such as system uptime, helpdesk response times, and project progress.

QUARTERLY

Strategic Planning Review

Assess the progress of the IT strategy and initiatives.
Make adjustments as needed to stay aligned with business goals.

Risk Management Assessment

Conduct a thorough review of IT risks and update the risk management plan, including assessing cybersecurity threats and compliance risks.

Project Portfolio Review

Evaluate the status of ongoing IT projects. Prioritize and allocate resources to ensure timely completion.

Vendor Performance Review

Assess the performance of IT vendors and service providers.
Address any issues and renegotiate contracts if necessary.

BI-ANNUALLY

Board Update Meeting

Prepare and present updates for Bi-Annual Technology Operations. Confirm content with executive team and review discussions prior.

ANNUALLY

IT Strategy Development

Develop and update the IT strategy for the coming year. Ensure it aligns with the overall business strategy and goals.

Budget Planning

Prepare the IT budget for the upcoming year. Justify expenditures and secure approval from senior management.

Technology Roadmap

Create or update the technology roadmap, outlining planned technology investments and initiatives.

Compliance and Audit

Conduct a comprehensive review of IT compliance with relevant laws and regulations. Prepare for and manage any internal or external audits.

Disaster Recovery and Business Continuity Planning

Review and update disaster recovery and business continuity plans. Conduct drills and tests to ensure preparedness.

Technology Trends Analysis

Stay informed about emerging technologies and industry trends. Assess their potential impact on the business and plan for adoption if beneficial.

AS NEEDED

Site Visits: Conduct in-person visits to organization's sites to review on-site operational practices and initiate necessary changes.

Identify and Lead Major Technology Projects: Work with vendors and your team to execute business-moving projects

CIO Representation: Proper C-level IT representation when warranted

Technology Leadership Deliverables: Provide other technology leadership deliverables and best practices
